

YUGANT SONI

Results-driven Business Analyst with a passion for continuous learning and professional growth. Skilled in analyzing complex data sets and identifying opportunities for process improvement. Committed to delivering high-quality work within tight deadlines.

EXPERIENCE :

BigBasket, Bangalore, Karnataka- *Business Analyst*

Mar 2022 - July 2024

Managed and optimized the grocery delivery process to guarantee timely deliveries to customers. Over a 1.5-year period, we achieved an 85% on-time delivery rate.

Utilized data analytics to discern sales trends and patterns, leading to a consistent 5% month-on-month business growth.

Created and supervised project plans, encompassing timelines, budgets, and resource allocation, ensuring the punctual and effective completion of projects.

Conducted reviews of individual store profit and loss statements, proposing recommendations that facilitated break-even and profitability. This effort resulted in 44 stores achieving positive growth over the course of 1.5 years.

Provided training and mentorship to new team members, ensuring they contribute effectively to the team.

Cognizant, Bangalore, Karnataka — *SDET-QEA*

March 2021 - March 2022

Executed a comprehensive testing strategy using java for the mobile app of an american chain of pet superstores.

Collaborated with cross-functional teams, including developers, product managers, and other stakeholders, to understand and test new features and requirements.

Developed and maintained a comprehensive test suite that covered all aspects of the mobile app, including functionality, performance and security.

PROJECTS :

Self - Driving Car using Convolutional Neural Networks-

Designed and implemented a self-driving car system using Convolutional Neural Networks to navigate roads and avoid obstacles.

Utilized CNNs to extract features from sensor data, including camera images and LiDAR scans.

Developed a reinforcement learning algorithm to train the car to make optimal driving decisions and achieved accuracy of 92%.
